ELEC 3004 – Systems: Signals & Controls

Course Feedback Survey

(1) Platypus is an experimental (beta version) e-homework system (which saved about 6400 pages (~35/student) this year and resulted in faster turn-around). What’s your opinion of this tool?

(2) For Platypus, which features/improvements are most important to you (1=less/not important, 5=more/very important)
   a. Figure drawing tool
   b. Google Docs integration
   c. To immediately get your grade after you’ve finished peer reviewing
   d. Ability to do extra “peer review”
   e. Mathtype like equation editor
   f. (other)________________________________________________

(3) For Platypus, what would be a better incentive mechanism for peer review (1=no motivation, 5=lots of motivation)
   a. Extra credit for peer review
   b. Chance at small cash prize (~$100) with more “chance” based on the automated review quality measurement
   c. Nothing (the reward of helping others is enough)
   d. Peer review comments graded by tutors
   e. Best of / Worst of peer review shared in class
   f. (other)_________________________________________________
(4) Are you content with the teaching staff (tutors, lecturer(s))? 
__________________________________________________________

__________________________________________________________
__________________________________________________________
__________________________________________________________

(6) Do you like the laboratory (practical) sessions and their “Extra Credit” grading policy? 
__________________________________________________________
__________________________________________________________
__________________________________________________________
__________________________________________________________
__________________________________________________________

(7) Of the following sub-topics would you like more or less coverage (1=less, 5=more) 
   a. Linear systems
   b. Linear algebra (eigenvalues, least-squares, etc.)
   c. Filters
   d. Digital Controls
   e. State-Space
   f. (other)__________________________________________
